The portable, easy-to-use, very durable GoTalk4 is an ideal beginning AAC device. It can also be used as a teaching tool that kids can use independently! Go Talk4 has four levels with 4.5 minutes of total recording time, giving a generous 16 seconds per message. Plus, an extra message (yellow button, below the handle) is available for frequent communications or as a personal ID. Message keys are big (3" square), letting you use large, clear picture cues. The entire message area is active, so users can touch any part of the image to communicate. A light touch is all that needed.
