

Assistive Technology Tools for Reading

There is a wide range of assistive technology (AT) tools available to help individuals who struggle with reading. While each type of tool works a little differently, all of these tools help by presenting text as speech. These tools help facilitate decoding, reading fluency, and comprehension. (Kristin Stanberry and Marshall H. Raskind, 2009)

LD Online - a leading website on learning disabilities and ADHD, offers a lot of information on AT for reading:
