

Universal Design for Learning

Universal Design for Learning (UDL) is a set of principles for curriculum development that give all individuals equal opportunities to learn.

UDL provides a blueprint for creating instructional goals, methods, materials, and assessments that work for everyone--not a single, one-size-fits-all solution but rather flexible approaches that can be customized and adjusted for individual needs.

CAST: Center for Applied Special Technology, is a nonprofit educational research and development organization that works to expand learning opportunities for all individuals through Universal Design for Learning. It is the leading resource for UDL.
